

We have an issue where the `<!DOCTYPE html>` is not rendering at the top of the page.

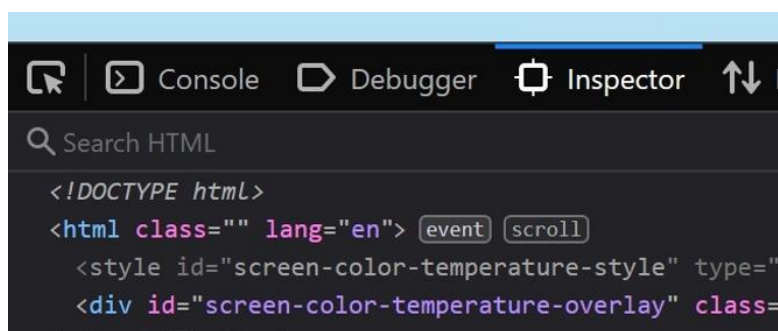

However, it is present in the header.php code.

```

Edit Themes
Oculus Child: header.php
Selected file content:
6 *
7 * @link https://developer.wordpress.c
8 *
9 * @package WordPress
10 * @subpackage Oculus
11 * @since 1.0
12 * @version 1.0
13 */
14 ?>
15
16 <!DOCTYPE html>
17 <html <?php language_attributes(); ?>
```

Compared to a normal website where the doctype is rendered below:

We suspect this of causing some CSS problems on Safari on iPhones. Is there a way to fix this?
